

Arse² Facts

the bottom line

Your arse doesn't have to be damaged or bleeding to be vulnerable to HIV. Its thin lining can absorb cum into your body, making it easy for HIV to get into your bloodstream.

You can protect yourself by making sure he uses condoms when you get fucked

For more arse facts and information on HIV, AIDS and safer sex, visit www.gmfa.org.uk/arse or call The London Gay Men's Sexual Health Helpline on 020 7998 4161

GMFA projects are developed by positive and negative volunteers. To volunteer or donate, go to www.gmfa.org.uk or call 020 7738 6872. Charity No. 1076854. Part of the London Gay Men's HIV Prevention Partnership.
