HIGGINS
TRUST

A registered charity in England & Wales (no.285527) and in Scotland (no.5039986).

CAUTION

PEP (post exposure prophylaxis) is a **one month** course of anti-HIV pills. Side effects can include diarrhoea, nausea and severe headaches.

PEP is NOT a substitute for condoms.

STOP HIV

PEP may prevent HIV infection after the virus has entered the body.

Treatment is available at all London sexual health clinics and hospital emergency departments.

ACT FAST

You must start PEP within 72 hours of unsafe sex or a condom breaking.

For more details: www.gmfa.org.uk/pep or call **THT DIRECT** GAY SEXUAL HEALTH  020 7998 4164
